“ I remember us riding our Cushman Motor Scooters all over Palos. His began using a lot of oil. We discovered the wrist pin had come loose and wore a groove into the side of the cylinder. This required new piston, rings and boring out the cylinder. Jack found the piston & rings but we had no way to bore out the cylinders. We rented a cylinder hone and took turns honing the cylinder until we could get the piston to fit. We were just kids but we figured out a way to make it work. Ride on Jack!
